

National Society Children of the American Colonists (NSCAC)

2025-2026 National Project: Colonial Collaboration

The National Society Children of the American Colonists National Project for 2025-2026 will focus on the use of technology and social media to connect current and prospective members, to foster collaboration with its sister organization the National Society Daughters of the American Colonists and create awareness and communication about NSCAC with other organizations and individuals.

To do this, the 2025-2026 National President's Project is twofold.

This national website <https://www.nationalsocietycac.org>, which launched in September 2025 is the legacy of our current / 72nd National President's Project. It features both public facing areas and private member's only pages on our site. This website serves as a collaborative tool for members to connect with each other by creating a pathway to foster community and present opportunity for online communication for CAC members across the United States. It also is a tool which connects NSCAC to the adult organizations of DAC & SAC. We would encourage you to join and collaborate with us!

The second part of our focus is the "Connecting to the Land", land trust campaign with Capitol Land Trust. Funds raised will support the "Inspiring Kids Preserve" and the "Bayshore Preserve" which are land trust areas dedicated to teaching children about our environment. CAC members are also encouraged to take part in volunteer opportunities in their respective states to help protect the sheer beauty of the America our Colonial Ancestors founded and as such, is our responsibility to protect.

To support this project, National President Julien Bancroft-Connors is offering a lapel pin (pictured above right) for a donation of \$10 or more to help us reach our goal of \$3,000. To order by mail, fill out the form below and mail with a check payable to NSCAC to:

Mr. Julien Bancroft-Connors, PO Box 5285, Lacey, WA 98509-5285.

NSCAC 2025-2026 National Project: Colonial Collaborator
